

### INPUT/OUTPUT HARNESS

Your Terminator X TBI kit may have a 3 Pin "Input/Output" connector and mating harness rather than the 8 pin mentioned in the Quick Start Guide (199R11990). The table below can be referenced to determine proper connections. Kits containing the 3 Pin "Input/Output" connector on the harness also include, Holley PN 558-420. These wires can be used to pin the remaining inputs and outputs directly to the Terminator X ECU connector if necessary.

Preconfigured Input/Output Wiring			
Description	ECU Pin	Connector Pin	Loose Wire Color
A/C Kick (Input #1)	A12	Use 558-420	White w/ Blue
Input #2	A3	Use 558-420	White w/ Red
Input #3	A13	Use 558-420	White w/ Black
Input #4	A4	Use 558-420	White w/ Green
Electric Fan #1 (Output #1)	B12	A	Gray w/ Yellow
Electric Fan #2 (Output #2)	B11	Use 558-420	Gray w/ Red
A/C Shutdown (Output #3)	B10	B	Gray w/ Black
Output #4	B3	C	Gray w/ Green
